

Cleaning Guide

SLIMLINE ALUMINIUM & PVC VENETIAN BLINDS

Keeping your blinds clean not only maintains their appearance but also prolongs their lifespan. Below is a simple guide to help you care for your Slimline Aluminium and PVC Venetian Blinds.

General Care Tips

1. Regular Maintenance – Weekly to Fortnightly

To prevent dust and dirt from building up:

- Close the blinds fully so the slats are flat.
- Dust using a microfibre cloth or duster with a soft brush attachment.
- Gently run the cloth along each slat from left to right.
- Flip the slats the opposite direction and repeat on the other side.

2. Deeper Cleaning – Monthly or As Needed

For built-up grime, especially in kitchens or high-traffic areas:

- Fully close the blinds and remove dust first (as above).
- Prepare a bowl or bucket with lukewarm water and mild detergent (dishwashing liquid is fine).
- Dip a soft cloth or sponge into the soapy water, wring it out well, and wipe each slat individually.
- Flip slats and repeat on the other side.
- Wipe dry immediately with a clean, dry cloth to avoid water spots or streaks.

3. Spot Cleaning Tough Stains

If you notice any sticky residue or stains:

- Apply a small amount of soapy water directly to the area using a soft sponge.
- Never use abrasive scrubbers or strong chemicals – they can damage the surface of the slats.
- Gently wipe and rinse with a damp cloth.
- Dry immediately.

Cleaning Guide

SLIMLINE ALUMINIUM & PVC VENETIAN BLINDS

Keeping your blinds clean not only maintains their appearance but also prolongs their lifespan. Below is a simple guide to help you care for your Slimline Aluminium and PVC Venetian Blinds.

Important Tips

- ✓ Always test cleaning products on a small area first.
- ✓ Never use harsh chemicals, bleach, or abrasive tools.
- ✓ Avoid soaking or submerging Slimline blinds – they are not designed for immersion.
- ✓ For PVC Venetians, light water exposure is okay, but never force dry them in direct sun or with heat.

Please Note:

Warranty does **NOT** include any conditions resulting from damages caused by accidents, alterations, misuse, abuse, weathering, or failure to follow instructions with respect to measurement, installation, cleaning, and maintenance.
