

Cleaning Guide: Internal Blinds

VERTICALS, PANEL GLIDES & ROLLER BLINDS

To help you keep your blinds looking their best and lasting longer, follow these simple care instructions:

General Care Tips

1. Fabric Movement is Normal

- Slight changes in blind lengths can occur over time.
- Fabrics naturally expand and contract with moisture and temperature.
- This is a normal response and not a product fault.

2. Dust Regularly

- Dust build-up can shorten the life of your blinds.
- Use a soft cloth, feather duster, or vacuum with a brush attachment to gently remove dust.

3. Spot Cleaning Instructions

- For marks or smudges, gently wipe with a damp cloth or sponge using lukewarm water only.

Important: Do **NOT** soak, bleach, or use any cleaning products/chemicals.

4. Never Roll Up Damp Blinds

- Always allow blinds to dry completely before rolling them up.
- Rolling while damp can cause permanent damage or staining.

5. Be Cautious When Spot Cleaning

- Always test cleaning products on a hidden area first.
- Avoid heavy rubbing or using abrasive cloths to prevent damage.

Cleaning Guide: Internal Blinds

VERTICALS, PANEL GLIDES & ROLLER BLINDS

To help you keep your blinds looking their best and lasting longer, follow these simple care instructions:

For Deeper Cleaning

- Use a mild soap solution (diluted and gentle) on a damp cloth.
- Wipe gently from top to bottom, especially on roller and vertical blinds.
- Rinse the cloth and wipe again with clean water to remove any residue.

Regular care

=  longer life
 fresher look

Please Note:

By taking a little time to maintain your blinds, you'll keep them looking fresh and functioning well for years to come.
